

Funding estimates required for a full response to the global TB epidemic (2016 - 2020)

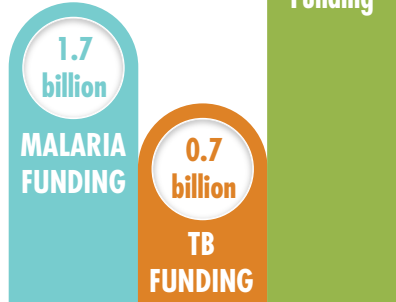

Southern Africa Tuberculosis and Health Systems Support (SATBHSS) Project

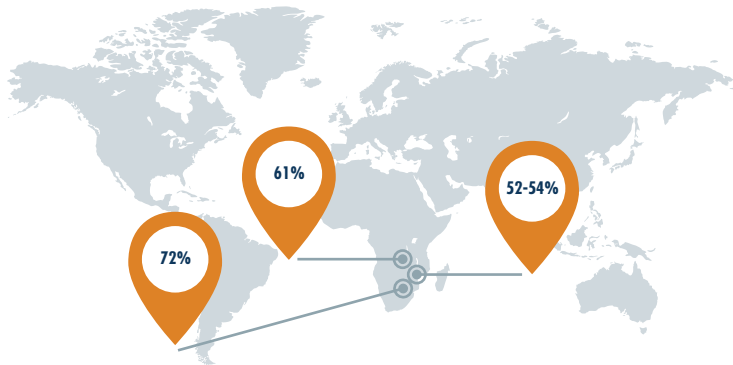

Funding for TB, HIV/AIDS & Malaria

2014
US\$

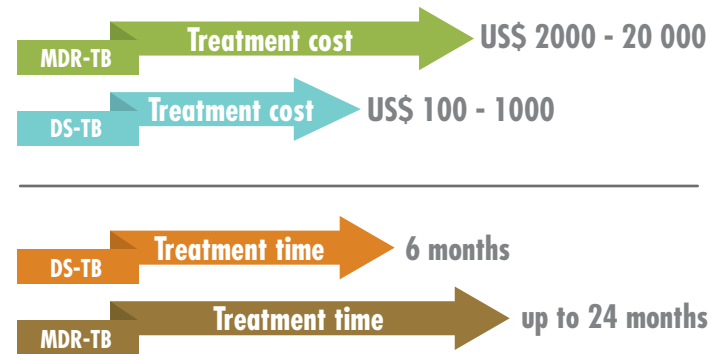

In 2014, international funding for TB = US\$ 0.7 billion, far short of funding for HIV/AIDS = US\$ 5.4 billion and Malaria = US\$ 1.7 billion

TB/HIV coinfection rates range from 52-54% in Mozambique and Malawi, 61% in Zambia and 72% in Lesotho

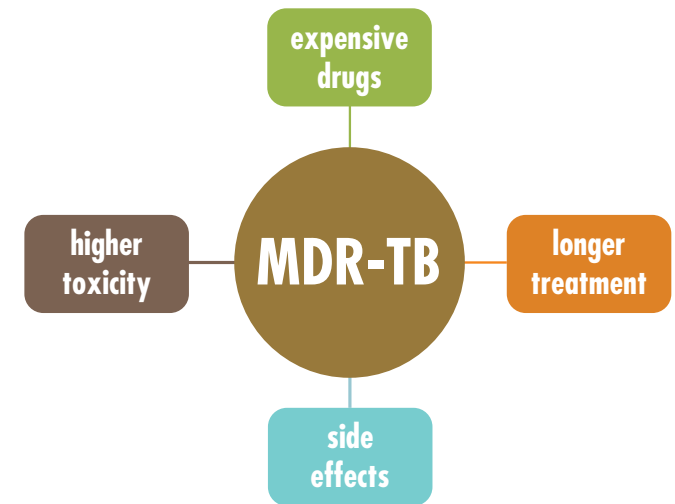

TB/HIV coinfection rates

Cost of treating TB per patient

DS-TB ranges from US\$ 100 - 1000. MDR-TB ranges from US\$ 2000 - 20 000. Treatment for MDR-TB takes up to 24 months in comparison with 6 months for DS-TB

TB remains the leading cause of death amongst people living with HIV in Africa

Treatment for MDR-TB
